

# SAINT-GOBAIN TOWER

**GENERAL CONTRACTOR**  
Generali

**ARCHITECT**  
Valode & Pistre

**ENGINEERING**  
Facade: Arcora  
Structure: Terrell

**PROJECT MANAGEMENT**  
BATEG

**SADEV CUSTOMER**  
- Eiffage metal (top of tower)  
- Hefi (bottom of tower)

**REALIZATION**  
2020

**SURFACE**  
50 000 m<sup>2</sup>

**HIGH**  
170 meters

- MAX. GLASS SIZE.: 3 000 x 1 850mm
- WEIGHT OF THE GLASS: 372kg
- S3030L AND S3030XL: TOWER HEAD AND FEET
- DESIGN AND MANUFACTURE OF A VEA SYSTEM ADAPTED TO THE PROJECT

## Design and manufacturing of all VEA parts, including:

- junction piece between the support and the fixing points (with adjustment and anti-rotation device).
- fasteners (spiders) adapted to the constraints of the project.
- rotules adapted according to regulation.
